

Dr. C. Howie Honeyman

Young Professionals Workshop Panel, 14th IWA Micropol & Ecohazard Conference 2026

Howie Honeyman, Chief Executive Officer & President, [Forward Water Technologies Corp.](#), has over 20 years of experience commercializing new technologies at Xerox, Cabot Corp., E Ink, Natrix Separations, and as the former CTO of GreenCentre Canada. He commercialized high-capacity, high-throughput membranes for bioprocessing as SVP of Natrix Separations, which was recently acquired by Millipore-Sigma. Other commercial successes include e-paper at E Ink and an MIT start-up, where he invented and led the team that developed the first commercial e-paper platform used in today's e-readers. Since 2015, Howie has been leading Forward Water to become a premier wastewater treatment solutions provider. Howie is also an inventor on over 50 U.S. patents and holds a PhD in Chemistry from the University of Toronto.
